What's New in the AutoCAD?

Draft on AutoCAD Enterprise, on your phone or tablet: Save time and stay on top of your projects by drawing on mobile devices using an iPad or iPhone. (video: 3:07 min.) "Snap to" Behavior and Command Line Ensure your drawings align automatically. Now you can create drawings where all lines snap to other drawing elements. Command line parameters also now support "snap to" behavior, which is a technique that ensures that drawing lines align correctly when the command line is used to draw lines. (video: 0:43 min.) Save Space and Readability: Less clutter, more information in your drawings. You'll see less clutter in your drawings, and it will be easier to make changes and view your work. (video: 0:33 min.) Added Custom Properties We've added the ability to create custom properties, which are used for advanced features in AutoCAD. You can now define custom properties that will be available in drawing and in many other places, and these properties can also be used to store additional information. (video: 0:44 min.) Improved Placement of Title Block and Viewers If you're a title block author, now you can position a title block automatically to the left, right, top or bottom of a block or line. This lets you place a title block automatically, without moving the entire title block. Drawing-Related Changes: Modified the OpenGL or Direct3D graphics driver to improve compatibility with macOS Catalina. Modified the graphing engine to improve accuracy and performance. Aberration Support: Added support for enhanced specification files that support the Aberration settings. Added support for the "generic" Aberration setting.
