## Fomm Crash On Login

Sep 16, 2012 - On Nexus login when trying to install the new Sexout Core and Data fomm, I keep getting an error message that directs me to crash.txt ... I installed them fine on the Nexus and they work. I was able to install it on the Nexus, but when I try to install it on the Nexus 5, I keep getting this. I have tried this on the Nexus 5e / 7 and 4 Plus and the error is always the same. I tried resetting the Nexus 5e to factory settings. But that didn't help. I also tried deleting / reinstalling fom data. And the problem remains. I also tried to install fom, but I still get the same error. I am using the latest version of Lollipop ROM.
