Incremental Loading Incremental Loading is a feature of AutoCAD in which the software checks to see if it has loaded any drawings since the last time the drawing was opened and if not, it loads the drawing in. It can also be used to speed up the performance of the software when working with large or complex drawings. If an AutoCAD user opens a drawing containing the same file format as the last drawing open, AutoCAD automatically loads the drawing. Any changes made in the new drawing are reflected in the older one. 2D DWG support AutoCAD supports the 2D drawing exchange format (DWG) or DWF. It can import and export both DWF and DXF drawings and can handle the newer DWF 2.0 format. DWF is primarily used in CAD packages for architectural drawings, but is also supported in other areas of CAD. AutoCAD 2D DWG support enables AutoCAD DWF capabilities within AutoCAD environments and vice versa. 3D DWG support AutoCAD supports the 3D drawing exchange format (DWG) or 3D DWF. It can import and export both 3D and 2D DWF and DXF drawings and can handle the newer DWF 3.0 format. It has many of the features of AutoCAD and is perfect for graphics design and 2D drafting. It is a great choice for those who have worked with AutoCAD, but wish to move on to something simpler.
