

Title, Developing Skills for Professional Development: Complete Professional Development Workbook, KPDS and TOEFL, US business school workbook Project Objective: To provide students of American business companies, as well as entry-level students, with the ability to prepare a complete functional package for obtaining an MBA program. Work program: A complete functional set for studying in US business schools. Will be made up of a sequence of specially designed and structured work programs. In addition, we have made it possible to use general categories of words (such as "science", "technology", "management", etc.) that will be equally understandable to everyone. We tried to make sure that students can complete tests as quickly as possible by combining a user-friendly interface with a thoughtful design. We create tools and templates for each online course, both business-oriented and basic. We are working with online course developers to improve these tools. Our main goal is to develop skills for learning, which is very important for an MBA. But we also put a lot of emphasis on questions that can get students to ask questions. Support for students and our partners There are many resources available to help students who want to improve their skills. All our teachers are qualified specialists who are interested in improving the professionalism of students. Joint practice with other students We support students from different schools, thanks to our joint work, they can learn from each other. Our students will know they can get the support they need. During the training, students will have the opportunity to expand their knowledge using various sources. We also hope that we will be able to receive help from experienced teachers who will help students continue their studies, based on the knowledge gained during their studies. Gratitude of the Academy of Business Education at the International Business School Chapter (ICBS) in the province of British Columbia, Moscow and St. Petersburg ITC Europe (www.itc-europe.com...), London Thanks to our developers, the students who write the terms of reference for our courses, and many other people living in America, we have been able to succeed and achieve our goals. We wish them further success in the development of their project! For an academic group, over 450 students Business students - English, IT, computer graphics, MBA staff Technical support for students Fill out a questionnaire where you can indicate your level of English and your student agreement
