What's New in the?

Presented in a sturdy, modern design with stunning color-reinforced safety glass doors, the 2-drawer walk-in bathroom is crafted from durable 1" thick MDF and laminate. A storage drawer is fitted beneath the mirror, and the 24" vanity adds extra counter space to perfect your morning routines. With convenient counter space and a spacious vanity with ample storage, this charming bathroom will fit in any apartment or house with space for a walk-in bathroom. Space saving for the kitchen - 2/3 of space saved by eliminating the door. 1/2 of space saved by eliminating the countertop. Not that it's hard to love, since it was my first major remodel, but this was so much trouble. Very loose in the drawers and didn't feel solid. Checked it out with the manager and she said that was normal. Took it back. Replaced with a different sink. Also, paint was flaking off the doors, and had to be repainted. The only good thing I can say is that it had some type of sealer/water proofing, which allowed me to have a bathroom sink and shower in my otherwise minimal kitchen! Not sure if it was because it was new or just so I could install it, but the paint they put on made it look very new. I had left a sink in my kitchen and just backed it in here. Not much room for the commode. But the vanity and the counter was just perfect. Pretty great stuff, but the software to use is tricky. The directions are quite good, but some of the features don't work like they should. For example the toggle switch on the wall, which used to turn on both the light and the fan, only toggles the light. The fan stays off. There is no toggle switch on the control panel that can be seen. So make sure you do a lot of prep work before you get out there and start cutting corners. We also had to replace the door handle. You need to rip it off as the existing one wasn't working right and wouldn't stay secured. I had begun construction of my kitchen and there was no time for me to finish the steps because I wanted it done before the rainy season. So I did the best I could. I got it completed in October and the first rainy day of the season, the first time I would be using the bathroom. I could have used more time though. The front door would not lock and was
