It's possible to use SciONE to calculate (and plot) any differential or integral. You can also solve scientific equations, (reciprocals, natural log, etc...) and if you don't know what to do, we may suggest an equation. It is also possible to do temperature (gradients), volume, area, length, mass, energy, force, frequency, power, acceleration, velocity, height, density, pressure, time. It is also possible to convert between any 2 types of units, such as mass to length, or energy to length. The application also offers a handful of functions for easy conversion, such as percent, square root, nth root, natural log, infinity, and complex numbers. A user guide for help is included. A step by step instruction manual can be downloaded here. Image courtesy of Image courtesy of Copyright: SciONE2016 License: Free for educational use only.
